Corner source: Humans have neurology and mentality, when affecting neurology or mentality will cause social sickness. Usually people with social sickness, they have personal or work psychology. Problems that make them anxious, miserable, addicted, overworked, lack of exercise, lack of sleep, lack of entertainment, susceptible to social sickness.

Entering Social Sickness: Humans who work in a noisy "sound" environment cause more fluctuated neurology, which are more likely to cause them to feel sensitive and easily get sick when they have anxiety. People who work with the communication environment (words back and forth) affect psychology very much, easily causing anxiety about psychology (too much psychology) susceptible to social sickness.

Out Of Social Sickness: When a person has a serious social sickness, they cling to a high psychology. They often worry all day and think about it. To communicate with society to (psychological balance) For example: One day you think too much or too many worries, social sickness are increasing. When you go outside to socialize you have another mentality to balance, the level clinging to a psychology will decrease. You need to pay attention to entertainment like listening to music and exercising.

Exercise:

30 Minutes In The Morning: Morning the best exercise for the body, because the food you eat yesterday created a lot of thermal in the body, when exercising exiting thermal from the body. Feeling refreshed and healthier.

A Short Nap From 5 To 15 Minutes: A short sleep helps the nerve relax and become more alert. A short sleep enough to relax your nerves and doesn't make it difficult to sleep at night.

Listen To Music In The Evening: All day in work, you need personal entertainment like listening to music, it helps relax the nerve. The neurology has an erection and relaxation to keep awake.

Watching Movies At Night: Psychology works all day making you difficult to sleep. Must focus before going to sleep, it helps stabilize the psychology. Watching movies have focusing and relaxing to keep the mentality stable.

Overwork: Many families work excessively 7 days a week for a long time, are vulnerable to social sickness. If they are psychologically anxious, they enter a social sickness without knowing it. Psychology affects nerves, it leads to depression. When men or women enter neurasthenia often get problems of physiological worsening and feeling more sensitive and they lack interest in physiology.

Characteristics Of Emotions: Emotions often have weaknesses

- Feel angry: like sweet
- Feeling scary: reduce trust
- Feeling crying: easy emotions
- Feeling of collapse: no need for anything
- Feeling happy: mental relaxation
- Pollen sensation: strengthening spirit

Sensory Recovery: When the feeling of getting out of the body takes time to recover, depending on the age.

- 5 to 15 years old takes a day to recover
- 15 to 40 years old take 2 to 3 days to recover
- 40 to 70 years take 6 days to recover

For Example: One week you get angry once with your normal 20s, but if you get angry 4 times a week, the recovery rate slows down and continues to rise, easily getting social sickness. Too much anger caused psychology to be inhibited and easily angry when teasing psychology.

The Process Of Feeling: Psychological images create emotions.

- Psychology goes through the brain
- Nervous brain fluctuates slightly
- The brain activates emotions from the body

Depending on the psychological image that passes through the brain leading to human condition, psychological images such as beauty, the neurology fluctuates slightly in the brain on the back of the head. Creating a sense of pleasure in the brain and activating the sense of pollen (called the state) of pollen, the psychological image of disgust creates a formidable status.

Human Status:

- Stability
- Stable, oscillating
- Panic (leading to depression)
- Disorders (leading to response set illness)

Passion And Stability: The society has all the human statuses, depending on the occupation. Both, stepping into social sickness or escaping from social sickness help the society. For example: A person working in the research industry, they are passionate about studying too much. They easily fall into the situation and the mentality clings to the work very deeply. It helps a lot in research, but in contrast to people in a stable status, they have a clear look and clear observations around things instead of clinging to a passionate mentality. Both statuses, enter to the social sickness (seekers) and get out of social sickness (conscious). Both, help the society.

Human Psychology: People are created by the psychology of the family or the circumstances of each person, having person or the other in society. Increased social sickness push people to psychological worse. If many people live in (stable state and fluctuating state) it will help society reduce social evils and social unrest.

Habits And Systems: Changing daily habits or creating a working system that reduces neurological fluctuations, affects psychology, status, feelings, according to the circulatory system of Diagram Of Human Spirit help more stable.

Psychological Inhibition: Once you step into social sickness with a feeling of anger, the feeling of appearing many days leads to psychological inhibition. Common symptoms, you feel uncomfortable in front of your chest and easily angry when psychology teases you. Restoring this psychological inhibition, you must reduce your anger and live in a state (fluctuating) for about 3 months. You will no longer feel uncomfortable in your chest.

Social Unrest Increasing Follow Social Sickness: If one day you get angry once, 30 times a month and if a week you get angry once, 4 times a month. So society has a lot of psychology to be angry. Increasing social unrest if creating a system for people to enter social sickness causes many social unrest or social evils.
