Rule The Nation Conquer The World

(Social Sickness)

Corner source: Humans have neurology and mentality, when affecting neurology or mentality will cause social sickness. Usually people with social sickness, they have personal or work psychology. Problems that make them anxious, miserable, addicted, overworked, lack of exercise, lack of sleep, lack of entertainment, susceptible to social sickness.

Entering Social Sickness: Humans who work in a noisy "sound" environment cause more fluctuated neurology, which are more likely to cause them to feel sensitive and easily get sick when they have anxiety. People who work with the communication environment (words back and forth) affect psychology very much, easily causing anxiety about psychology (too much psychology) susceptible to social sickness.

Out Of Social Sickness: When a person has a serious social sickness, they cling to a high psychology. They often worry all day and think about it. To communicate with society to (psychological balance) For example: One day you think too much or too many worries, social sickness are increasing. When you go outside to socialize you have another mentality to balance, the level clinging to a psychology will decrease. You need to pay attention to entertainment like listening to music and exercising.

Rule The Nation Conquer The World

(Social Sickness)

Exercise:

30 Minutes In The Morning: Morning the best exercise for the body, because the food you eat yesterday created a lot of thermal in the body, when exercising exiting thermal from the body. Feeling refreshed and healthier.

A Short Nap From 5 To 15 Minutes: A short sleep helps the nerve relax and become more alert. A short sleep enough to relax your nerves and doesn't make it difficult to sleep at night.

Listen To Music In The Evening: All day in work, you need personal entertainment like listening to music, it helps relax the nerve. The neurology has an erection and relaxation to keep awake.

Watching Movies At Night: Psychology works all day making you difficult to sleep. Must focus before going to sleep, it helps stabilize the psychology. Watching movies have focusing and relaxing to keep the mentality stable.

Rule The Nation Conquer The World

(Social Sickness)

Overwork: Many families work excessively 7 days a week for a long time, are vulnerable to social sickness. If they are psychologically anxious, they enter a social sickness without knowing it. Psychology affects nerves, it leads to depression. When men or women enter neurasthenia often get problems of physiological worsening and feeling more sensitive and they lack interest in physiology.

Characteristics Of Emotions: Emotions often have weaknesses

- Feel angry: like sweet
- Feeling scary: reduce trust
- Feeling crying: easy emotions
- Feeling of collapse: no need for anything
- Feeling happy: mental relaxation
- Pollen sensation: strengthening spirit

Sensory Recovery: When the feeling of getting out of the body takes time to recover, depending on the age.

- 5 to 15 years old takes a day to recover
- 15 to 40 years old take 2 to 3 days to recover
- 40 to 70 years take 6 days to recover

For Example: One week you get angry once with your normal 20s, but if you get angry 4 times a week, the recovery rate slows down and continues to rise, easily getting social sickness. Too much anger caused psychology to be inhibited and easily angry when teasing psychology.

Rule The Nation Conquer The World

(Social Sickness)

The Process Of Feeling: Psychological images create emotions.

- Psychology goes through the brain
- Nervous brain fluctuates slightly
- The brain activates emotions from the body

Depending on the psychological image that passes through the brain leading to human condition, psychological images such as beauty, the neurology fluctuates slightly in the brain on the back of the head. Creating a sense of pleasure in the brain and activating the sense of pollen (called the state) of pollen, the psychological image of disgust creates a formidable status.

Human Status:

- Stability
- Stable, oscillating
- Panic (leading to depression)
- Disorders (leading to response set illness)

Rule The Nation Conquer The World

(Social Sickness)

Passion And Stability: The society has all the human statuses, depending on the occupation. Both, stepping into social sickness or escaping from social sickness help the society. For example: A person working in the research industry, they are passionate about studying too much. They easily fall into the situation and the mentality clings to the work very deeply. It helps a lot in research, but in contrast to people in a stable status, they have a clear look and clear observations around things instead of clinging to a passionate mentality. Both statuses, enter to the social sickness (seekers) and get out of social sickness (conscious). Both, help the society.

Human Psychology: People are created by the psychology of the family or the circumstances of each person, having person or the other in society. Increased social sickness push people to psychological worse. If many people live in (stable state and fluctuating state) it will help society reduce social evils and social unrest.

Rule The Nation Conquer The World

(Social Sickness)

Habits And Systems: Changing daily habits or creating a working system that reduces neurological fluctuations, affects psychology, status, feelings, according to the circulatory system of Diagram Of Human Spirit help more stable.

Psychological Inhibition: Once you step into social sickness with a feeling of anger, the feeling of appearing many days leads to psychological inhibition. Common symptoms, you feel uncomfortable in front of your chest and easily angry when psychology teases you. Restoring this psychological inhibition, you must reduce your anger and live in a state (fluctuating) for about 3 months. You will no longer feel uncomfortable in your chest.

Social Unrest Increasing Follow Social Sickness: If one day you get angry once, 30 times a month and if a week you get angry once, 4 times a month. So society has a lot of psychology to be angry. Increasing social unrest if creating a system for people to enter social sickness causes many social unrest or social evils.

Rule The Nation Conquer The World

(Social Sickness)

General Summary: All the psychology of society into the circulatory system of (Diagram Of Human Spirit) over time creates social sickness, depending on the level of emotion.

The Life And Living Environment

The atmosphere has electromagnetism, it's in the air because the sun and volcanoes are underground. The atmosphere has steam and it evaporates from the earth filled with seawater. The atmosphere has oxygen and it is in the air because of the natural forest.

The atmosphere exists forever, covering the earth with steam evaporating from the earth and falling back because of the sun and volcano. It spins and creates an atmosphere that covers the earth. Electromagnetic and steam keep warm, it stimulates plant cells to create natural forest and it provides oxygen in the air to help the environment have life. In environment has cloud and sound because the earth has steam evaporating, it combines a large amount of steam called clouds or rain clouds. The nearest clouds contain more water vapor and the taller clouds are thinner. When there is a large amount of water vapor (cloud rain) that touches the area with a lot of electromagnetism, it will produce a loud sound and it is called thunder. Electromagnetic in the air, it leads sound to the listener. It rotating circulate.

The Life And Human Life

Humans are created by a large number of animal cells like dinosaurs. While animals are decomposing, animal cells bind together into one. It has very high electromagnetism in the air that activates the cells together and creates the shape of the current human being. Human life must have the environment like the earth we live in now, it has steam, electromagnetism and oxygen.

Dangerous For Humans And The Environment

Destroying natural tree forests or arranging surrounding electricity and waves in the area where people live, it is dangerous for humans. Lack oxygen human will die, lack of water human will die and increasing exceed electromagnetisms human will die.

(Satellite And Electric Waves)

Wave:

Human collective protection needs to predict the level of reflected waves.

The government makes and assembles (mirror reflection of satellites) for any satellite to telecommunications. It must be through civil society such as politics, society, military và political economy.

Electricity:

Electricity 110v and 220v surrounds the society and creates too much electromagnetism.

It surrounds people, it causes neurasthenia and leads to social sickness. Reduce electricity from human living areas and switch to using hydrid. It helps the environment better for humans.

(Column Of Electric Wave)

(Network Coverage)

Change wave technology reflected to conventional electric wave columns, because reflected waves cause serious harm to people because people have electrical energy (electromagnetism).

Powerful reflected wave technology passes through the human body, affecting electricity from inside the body and affecting the movement of nerve cells that harm the circulatory system.

It makes people crazy.

Electromagnetism in thin atmosphere due to resistance of steam and oxygen, builds a high wave column to conduct far waves.

Electromagnetism is thick in space because there is no resistance of steam, oxygen, only sunshine so building a large electric wave column firmly out space.

Building electric wave columns to go couple the ground and in the space according to the model of high voltage power.

ENVIRONMENTAL RESCUE

(Building House To Isolate The Electromagnetic Wave)

Use electric plastic wire to create a piece of wall, one side of the wall with foil, laminate on wall to insulate the waves and electricity. The best way to isolate creates two pieces of electric plastic wire walls about 3 inches thick.

Isolation wall, there must be 2 walls and left blank between 2 walls, thus making it difficult for electromagnetic or waves to penetrate.

When the wave passes through the first layer wall, it impacts the electromagnetic there and weakens. It is very difficult to penetrate the next wall, it effectively isolates 99% of the electric waves.

Electromagnetic leads sound to listeners because people also have electrical and electromagnetic energy that impacts neurology and senses sound.

Create many electric plastic walls and foil (barbecue foil) because it effectively reduces the impact of waves and electromagnetic waves. Producing many pieces of electric plastic wire wall panels to build houses according to the current US model, sound isolation is very effective. It shows that electromagnetism is difficult to pass through such isolation, so building houses with wave and electricity isolation helps people avoid the impact of telecommunications from waves or electricity reflected on people.

(Shoot Object In Space)

F-15 Air Force:

Use F-15 because it has the lowest motor and must have real human to shoot objects in space.

Move close to the space and reduce or turn off the engine so that the F-15 can automatically launch into space. Then use the lowest motor to transport F-15 because there is no drag so only the smallest motor is used for transport, when it is necessary to turn on or off the F-15 engine for 15 minutes to keep safe.

Binocular:

Use binocular to search for the objects, the advantage of searching in space is that bright and look very far away.

Rule The Nation Conquer The World

(Social Sickness)

Corner source: Humans have neurology and mentality, when affecting neurology or mentality will cause social sickness. Usually people with social sickness, they have personal or work psychology. Problems that make them anxious, miserable, addicted, overworked, lack of exercise, lack of sleep, lack of entertainment, susceptible to social sickness.

Entering Social Sickness: Humans who work in a noisy "sound" environment cause more fluctuated neurology, which are more likely to cause them to feel sensitive and easily get sick when they have anxiety. People who work with the communication environment (words back and forth) affect psychology very much, easily causing anxiety about psychology (too much psychology) susceptible to social sickness.

Out Of Social Sickness: When a person has a serious social sickness, they cling to a high psychology. They often worry all day and think about it. To communicate with society to (psychological balance) For example: One day you think too much or too many worries, social sickness are increasing. When you go outside to socialize you have another mentality to balance, the level clinging to a psychology will decrease. You need to pay attention to entertainment like listening to music and exercising.

Rule The Nation Conquer The World

(Social Sickness)

Exercise:

30 Minutes In The Morning: Morning the best exercise for the body, because the food you eat yesterday created a lot of thermal in the body, when exercising exiting thermal from the body. Feeling refreshed and healthier.

A Short Nap From 5 To 15 Minutes: A short sleep helps the nerve relax and become more alert. A short sleep enough to relax your nerves and doesn't make it difficult to sleep at night.

Listen To Music In The Evening: All day in work, you need personal entertainment like listening to music, it helps relax the nerve. The neurology has an erection and relaxation to keep awake.

Watching Movies At Night: Psychology works all day making you difficult to sleep. Must focus before going to sleep, it helps stabilize the psychology. Watching movies have focusing and relaxing to keep the mentality stable.

Rule The Nation Conquer The World

(Social Sickness)

Overwork: Many families work excessively 7 days a week for a long time, are vulnerable to social sickness. If they are psychologically anxious, they enter a social sickness without knowing it. Psychology affects nerves, it leads to depression. When men or women enter neurasthenia often get problems of physiological worsening and feeling more sensitive and they lack interest in physiology.

Characteristics Of Emotions: Emotions often have weaknesses

- Feel angry: like sweet
- Feeling scary: reduce trust
- Feeling crying: easy emotions
- Feeling of collapse: no need for anything
- Feeling happy: mental relaxation
- Pollen sensation: strengthening spirit

Sensory Recovery: When the feeling of getting out of the body takes time to recover, depending on the age.

- 5 to 15 years old takes a day to recover
- 15 to 40 years old take 2 to 3 days to recover
- 40 to 70 years take 6 days to recover

For Example: One week you get angry once with your normal 20s, but if you get angry 4 times a week, the recovery rate slows down and continues to rise, easily getting social sickness. Too much anger caused psychology to be inhibited and easily angry when teasing psychology.

Rule The Nation Conquer The World

(Social Sickness)

The Process Of Feeling: Psychological images create emotions.

- Psychology goes through the brain
- Nervous brain fluctuates slightly
- The brain activates emotions from the body

Depending on the psychological image that passes through the brain leading to human condition, psychological images such as beauty, the neurology fluctuates slightly in the brain on the back of the head. Creating a sense of pleasure in the brain and activating the sense of pollen (called the state) of pollen, the psychological image of disgust creates a formidable status.

Human Status:

- Stability
- Stable, oscillating
- Panic (leading to depression)
- Disorders (leading to response set illness)

Rule The Nation Conquer The World

(Social Sickness)

Passion And Stability: The society has all the human statuses, depending on the occupation. Both, stepping into social sickness or escaping from social sickness help the society. For example: A person working in the research industry, they are passionate about studying too much. They easily fall into the situation and the mentality clings to the work very deeply. It helps a lot in research, but in contrast to people in a stable status, they have a clear look and clear observations around things instead of clinging to a passionate mentality. Both statuses, enter to the social sickness (seekers) and get out of social sickness (conscious). Both, help the society.

Human Psychology: People are created by the psychology of the family or the circumstances of each person, having person or the other in society. Increased social sickness push people to psychological worse. If many people live in (stable state and fluctuating state) it will help society reduce social evils and social unrest.

Rule The Nation Conquer The World

(Social Sickness)

Habits And Systems: Changing daily habits or creating a working system that reduces neurological fluctuations, affects psychology, status, feelings, according to the circulatory system of Diagram Of Human Spirit help more stable.

Psychological Inhibition: Once you step into social sickness with a feeling of anger, the feeling of appearing many days leads to psychological inhibition. Common symptoms, you feel uncomfortable in front of your chest and easily angry when psychology teases you. Restoring this psychological inhibition, you must reduce your anger and live in a state (fluctuating) for about 3 months. You will no longer feel uncomfortable in your chest.

Social Unrest Increasing Follow Social Sickness: If one day you get angry once, 30 times a month and if a week you get angry once, 4 times a month. So society has a lot of psychology to be angry. Increasing social unrest if creating a system for people to enter social sickness causes many social unrest or social evils.

Rule The Nation Conquer The World

(Social Sickness)

General Summary: All the psychology of society into the circulatory system of (Diagram Of Human Spirit) over time creates social sickness, depending on the level of emotion.

BREAKTHROUGH

Air Circulation

Respiratory Circulation

Is Pure Land

Psychology:

Martial Arts

The lower jaw moves backwards, keeping the lower jaw behind the upper jaw and letting the throat circulate air and the throat circulates the air for about 5 to 7 minutes to help the brain get enough oxygen.

It regulates with respiration and nerves. It helps stabilize all states and feelings like fear, anger, boredom, suffering, fatigue and more.

When in a state of disorder with psychological symptoms (reflux), the disorder causes response set sickness.

It affects emotions a lot, thus keeping the air circulating 6 months to 1 year and then returning to a stable state.

Surgery

Surgery of the Palatine Tonsils in the throat for easy circulating respiration in the human circulatory system.

The brain is healthier when there is enough oxygen and helps humans feel state more stable, relax their nerves, become more alert and also reduce the flu in the body.

Perception, mentality, state, feeling, help all, look at the human circulatory system, circulate the air to reduce social sickness.

Surgery:

Suction Palatine Tonsils located in the inner wall of the throat

1. Find the tube to expand the throat and make the hole exactly at the Palatine Tonsils meat ring.
2. Place the tube in the throat to the tonsils Palatine.
3. Cut the bricks and pry the flesh of the palatine tonsils.
4. Place the tube into the inner wall of the skin over the flesh of the Palatine Tonsils and insert the tube deeply to slowly suck it out.
5. Suction at a safe level of about 40 watts.
6. Sew and patch carefully.
7. Pick up the cut skin up and then sew it across, if not sew it will get itchy throat.

Provide nutrient seawater and blood and do not eat hard food.

The environment has electromagnetic and technological reflexive lead many people hear telecommunications due to human cell melting and electrical disturbances. Telecommunications have electromagnetic carrier that are reflecting down to humans. Humans are purely cellular

objects, the water behind the skin. The cell object is a water particle when it encounters an electromagnetic particle the water particle will melt. Telecommunications harm cell melting.
